Balancing privacy & security: the role of privacy and civil liberties programs. That our privacy and civil liberties programs are adequately preparing collected information for potential sharing within the ISE, if and when such an authorized need arises. • By holding our respective privacy and civil liberties programs accountable for ensuring that the information we collect is used only for authorized purposes.

NIST privacy framework: a tool for improving privacy. The framework—through a risk- and outcome-based approach—is flexible enough to address diverse privacy needs, enable more innovative and effective solutions that can lead to better outcomes for individuals and organizations, and stay current with technology trends, such as artificial intelligence and

Optimizing privacy-accuracy tradeoff for privacy classification accuracy. • We propose a rule-based approach to further optimize the group size selection. This approach uses binary search and several rules to quickly narrow down the range of group sizes. • We conducted extensive experiments using real data sets and the results show that this approach can achieve high accuracy with significantly fewer rules.
